## DECORATIVE INTERIOR WALL PAINT WITH A VELVET TOUCH EFFECT

Decorative coating that gives to the wall a pleasant tactile surface with a matt and velvety effect. It instantly transforms hard surfaces into sensational new textures that feel like suede or soft leather. It allows to create velour-, suede- and nubuck like chromatic effects that are ideal matching the modern design of high end decoration of interior walls. Due to its specially designed optimal formulations we design products specifically for trowel or for brush in order to achieve a decoration of luxury inter, in line with the most modern and ground-breaking trends of matt “concreteness” in architecture. The paint is produced in Latvia in Northern Europe and complies with the highest standards of the European Union.

**SILK  
PLASTER®**

# Nappa

The material is intended for finishing walls and ceilings in interiors, restoration of old and finishing of new buildings, as well as for finishing hotels, shopping and office centers or other public spaces. And also for finishing furniture elements and stucco decoration, etc. It is also suitable as a protective top coating for mineral decorative plasters such as Travertino and ArchiConcrete.

## PERFORMANCE

The surfaces with Nappa top coating ensure deep, sensational and emotional effects, perfectly aligned with the most modern and cutting edge trends for interiors in architectural fields.

The coating is easy to apply. Nappa allows the appearance of fabrics, such as linen, cashmere, velour, nubuck, corduroy, denim.

Nappa has good water resistance and washable properties.

## APPLICATION

On substrate prepared with two coats of Silk Plaster BaseT, apply two layers of paint with “spalter” brush or stainless steel trowel, in crossed movements or follow different effects : suede fabric effect by brush, nubuck by trowel, suede fabric effect by sponge, linen fabric effect by roller etc.

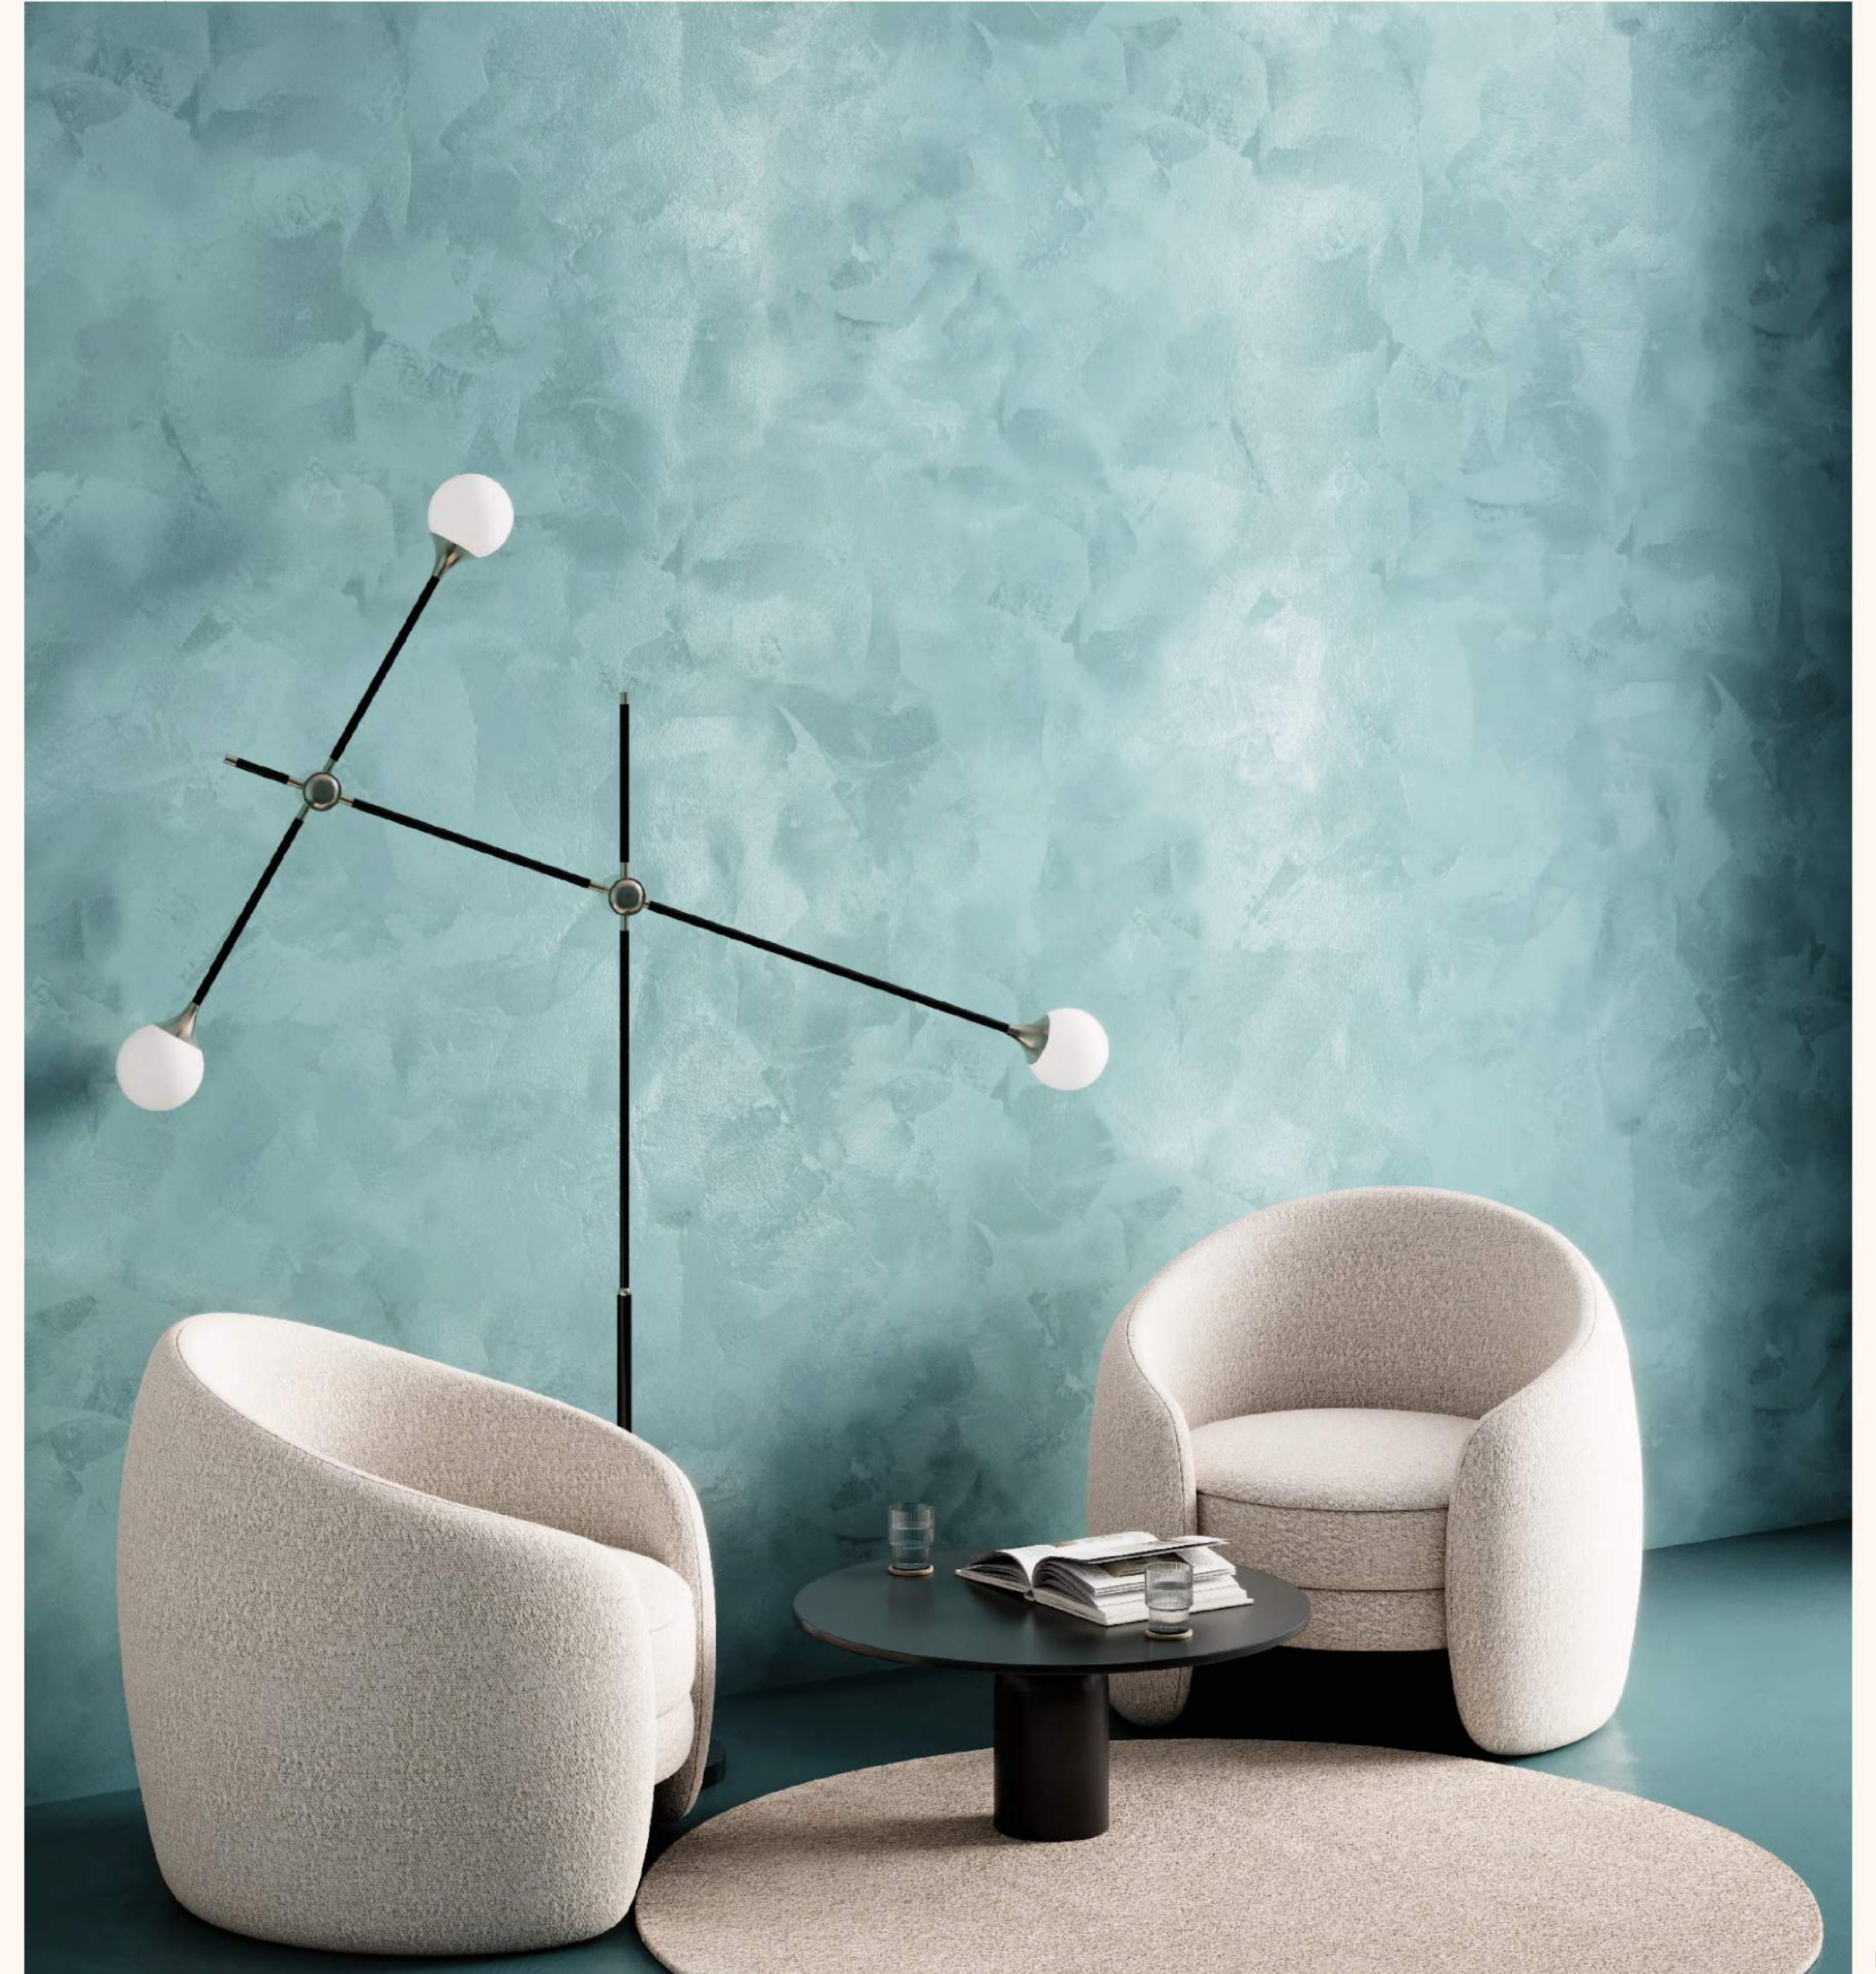

# Seta8

## DECORATIVE TOP-COAT FINISHING WITH "WASHED OUT" EFFECT

SETA8 is a decorative top coat finishing for interiors with beautiful wet silk visual effects and a stunning game of shades. It allows to create velvet-like chromatic effects that are ideal matching the modern design of high end decoration of interior walls. Decoration of luxury inter, in line with the most modern and ground-breaking trends of "concreteness" in architecture. The decorative paint is produced in Latvia in Northern Europe and complies with the highest standards of the European Union.

SILK  
PLASTER®

# Seta8

The material is intended for finishing walls and ceilings in interiors, restoration of old and finishing of new buildings, as well as for finishing hotels, shopping and office centers or other public spaces. And also for finishing furniture elements and stucco decoration, etc.

## PERFORMANCE

Beautiful 'wet out' silk visual effects and a stunning game of shades.

SETA8 fulfills the widest demands for interior finishes, ensuring both textured-like feels and prestigious effects with its soft metallic shades.

SETA8 allows to create contemporary and exclusive effects of classic 'washed out' effect and Florentine Silk effect of compressed high class fabric ('Firenze Seta')

## APPLICATION

Apply a thin and even 1st layer of material in different directions, making sure to cover the entire surface, avoiding gaps and overlaps. Smooth the material with a trowel at a slight angle to the surface.

After the 1st layer has dried completely, apply the 2nd layer of the material, covering the entire surface tightly. The 2nd coat should be approximately twice as thick as the 1st coat. Next, immediately, without waiting for the material to dry, cross back and forth to form a silk texture, creating a pearlescent effect on the surface.

Or with a trowel or a round spatula (washer), spread the still wet material with continuous rotating and chaotic movements repeating the figure eight (8) or infinity sign  $\infty$  until the desired effect is obtained. Apply with the smooth side of the tool, leaning it completely against the plane.

# Asti Fine

## DECORATIVE INTERIOR PAINT, DELICATE SANDBLASTED METALLIC EFFECT

ASTI FINE is a “ready to use” decorative, composed of sands and pearlescent fillers, with a delicate and modern sandblasted metallic effect. There are no words to describe the beauty and the uniqueness of our Metallic Sands (‘EFFETTO SABBIAATO’), since they are absolutely fascinating and unusual due to their intrinsic nature. ASTI FINE is a decorative coating for interiors, ideal for creating reflective shades that change according to the light. Suitable for obtaining special decorations with a rough and textured effect. Contains lightly metallic pigments that create a changeable and pleasant play of light and reflected colors. The final effect is slightly textured and lighter than our SABBIA product. The paint is produced in Latvia in Northern Europe and complies with the highest standards of the European Union.

**SILK  
PLASTER®**

# Asti Fine

It is possible to use it on various supports such as inner plasterboard, gypsum, plastic, wood, aluminum, iron, sheet galvanized preventively dealt with specific primers.

## PERFORMANCE

The application of SABBIA and ASTI FINE is simple and practical thanks to its application with a brush.

The effect is washable

The versatility of SABBIA and ASTI FINE allows it to achieve a huge number of customized effects, depending on the decorator's taste.

## APPLICATION

With a brush, apply the material in strokes, circular or intermittent motions, covering the entire surface, leaving no gaps and distributing the quartz filler evenly over the entire area. Depending on the properties of the surface and the direction of movement of the brush, a different decorative effect can be achieved. At the same time, without allowing the material to dry, lightly brush to form the desired pattern or direction of quartz filler particles.

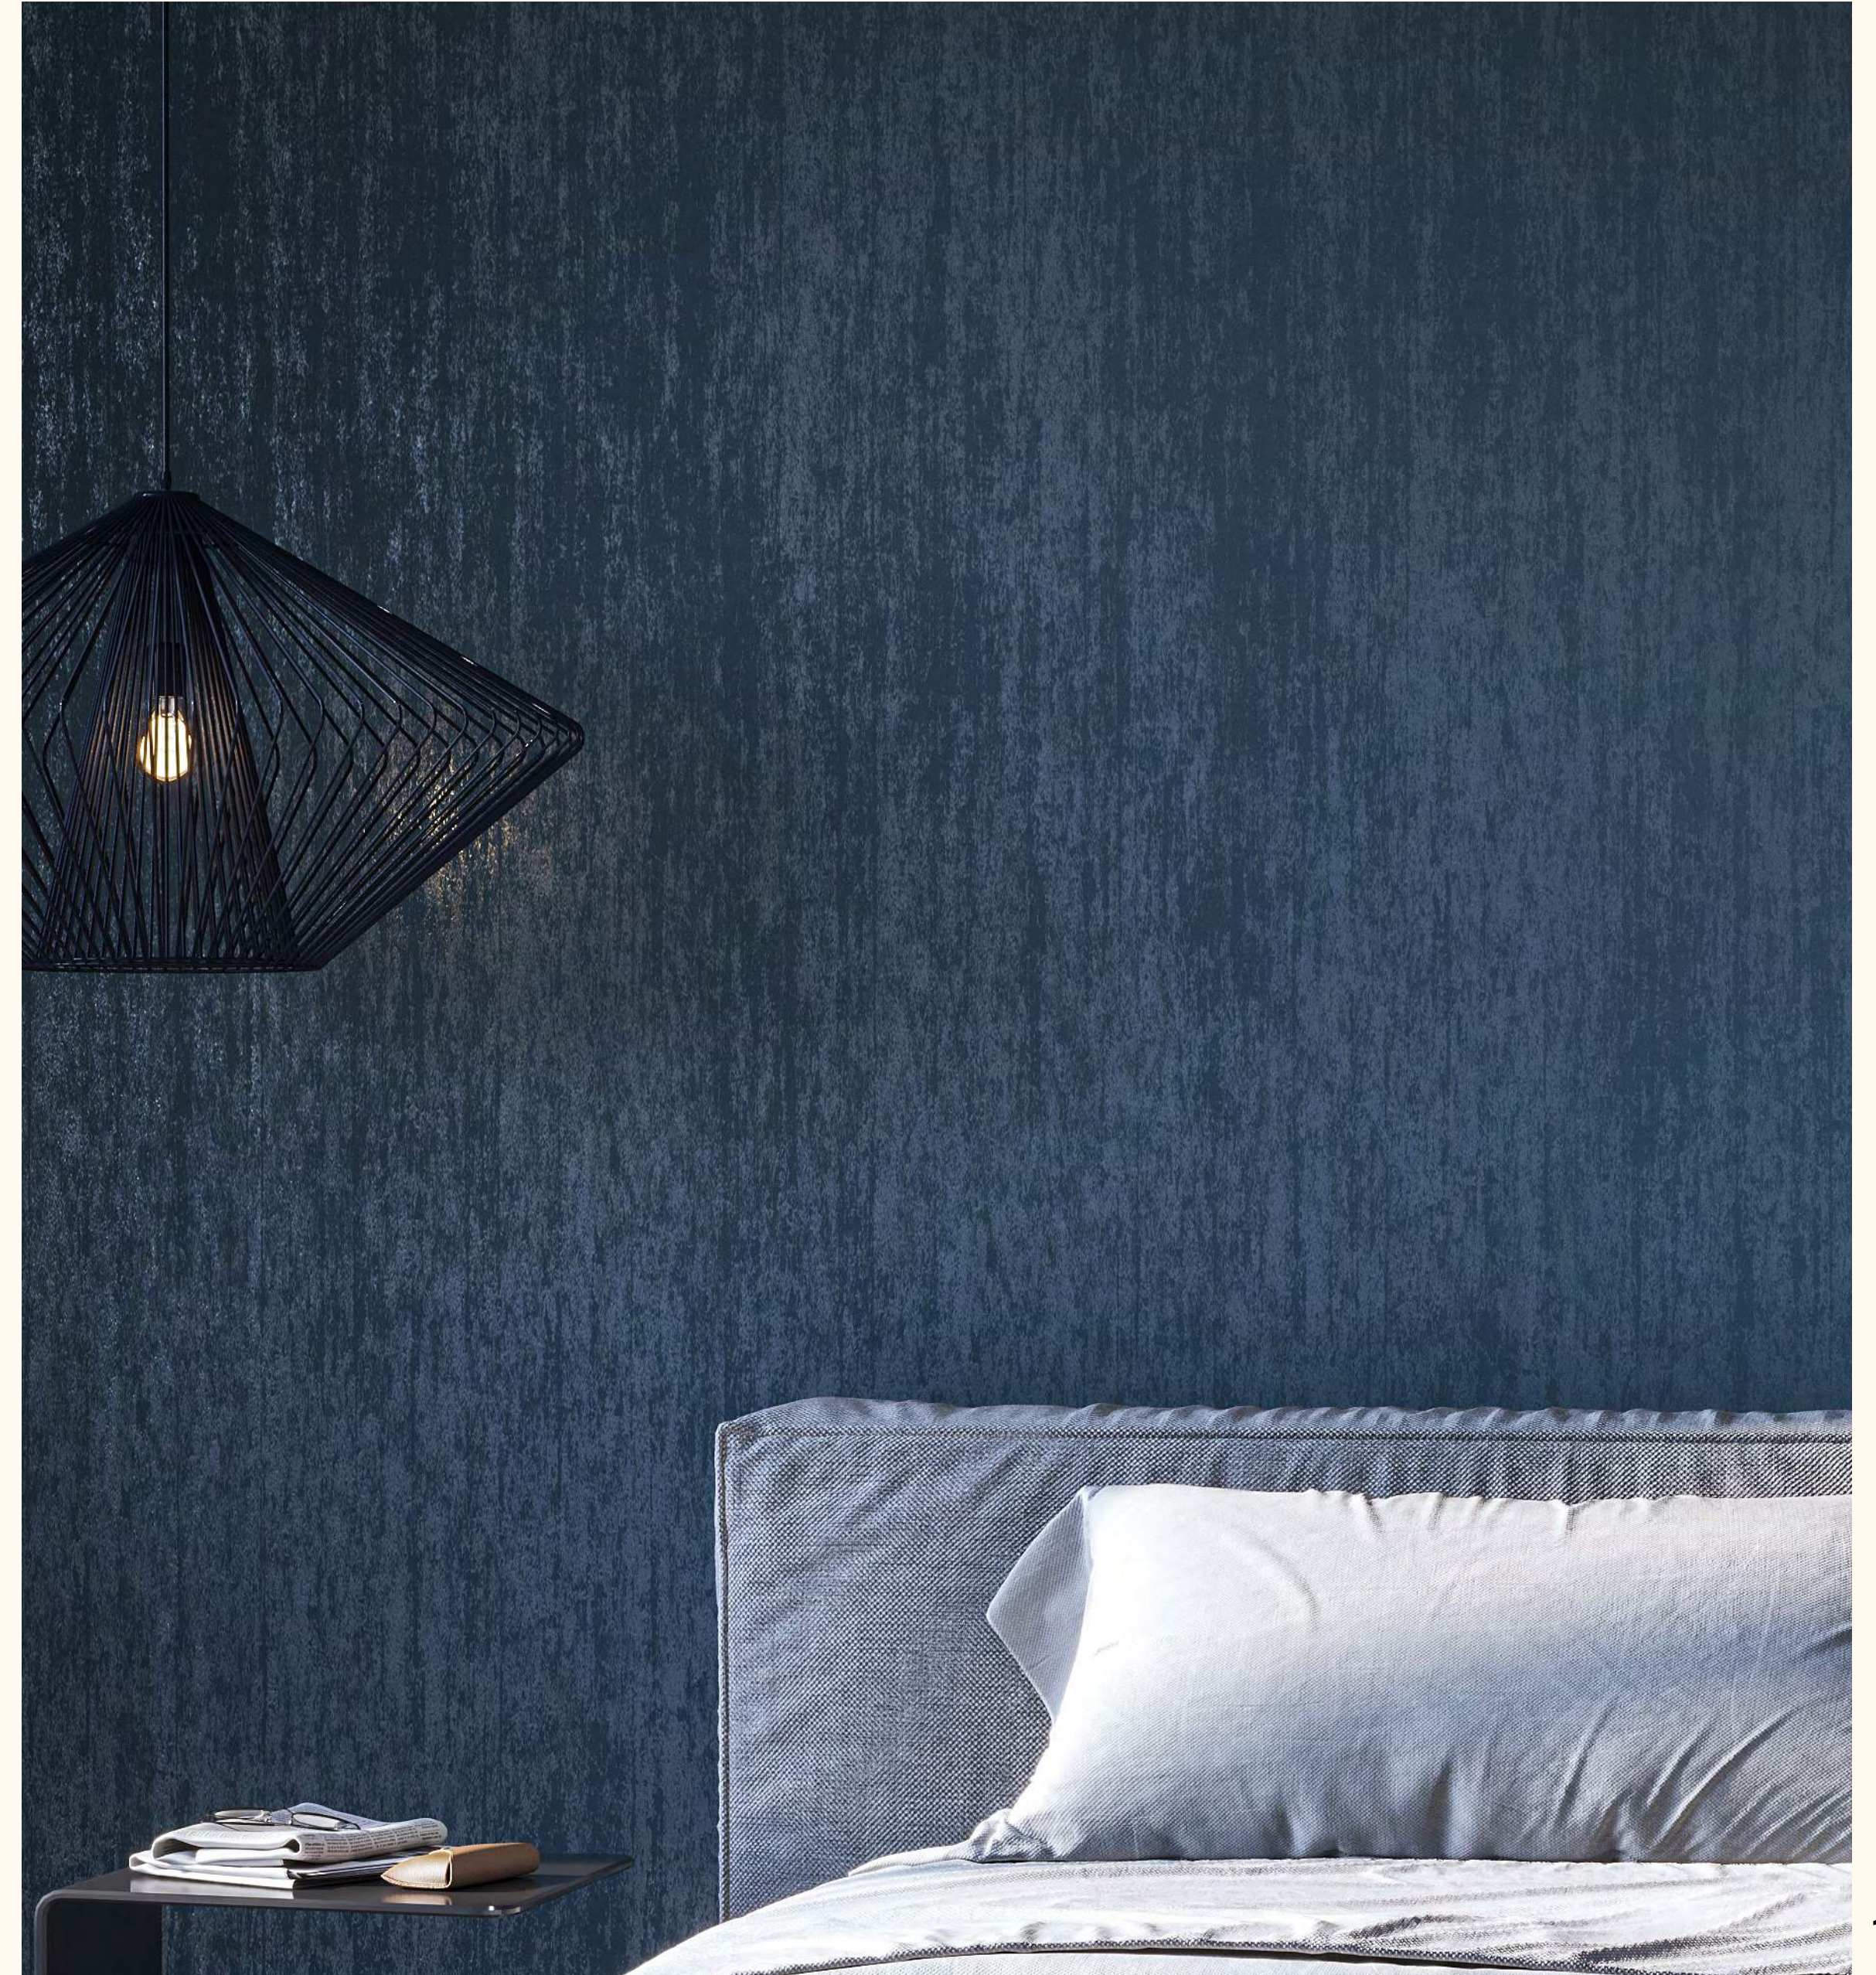

# Sabbia

## DECORATIVE INTERIOR PAINT, DELICATE SANDBLASTED METALLIC EFFECT
